

ENVIRONMENTAL POLICY

ETIPACK S.p.A. is committed to managing its activities in a responsible and sustainable manner, taking into account its overall environmental impact and striving to improve its performance in specific areas such as energy consumption and greenhouse gas emissions, water consumption and discharge, waste management, and product life cycle.

This policy applies to all employees, managers, contractors, and business partners.

ETIPACK S.p.A. is committed to:

- Reducing gross greenhouse gas emissions from Scope 1 and Scope 2;
- Monitoring energy consumption and investing in processes aimed at reducing it;
- Adopting practices for waste reduction, separate collection, recovery, and proper disposal, prioritizing material recovery wherever possible;
- Selecting suppliers who share our commitment to reducing their carbon footprint;
- Ensuring that the entire product life cycle is considered during all design phases in order to minimize energy consumption and waste emissions;
- Ensuring customer health and safety by designing safe and environmentally friendly products;
- Promoting the continuous improvement of its environmental performance.

Our commitments will be implemented through specific objectives:

- Reduce energy consumption by 10% by 2030;
- Reduce paper consumption by 10% by 2030 through document digitalization, the use of electronic signatures, and double-sided printing where possible;
- Introduce smart working systems by 2030 to reduce commuting.

This policy is periodically reviewed and updated to ensure its effectiveness, alignment with corporate objectives, continuous improvement of environmental performance, and compliance with applicable regulatory requirements.
